

REMARKS

Claims 1-12 are cancelled. New claims 13-17 are presented. The claims are supported throughout the application, particularly on pages 3-5. Independent claim 13 recites triangulation operations to produce a similarity value. The similarity value is then assessed for a non-exact match. Only then is a direct comparison of two documents performed. The previous claims of record were directed toward identifying identical similarity scores and did not include a subsequent direct comparison.

If there are any residual issues that need to be resolved prior to allowing the application, the Examiner is requested to contact the undersigned.
